EXPERIENCE

Backend Developer, Razorpay

Feb 2022 - Present

Worked as a **Subject Matter Expert for Subscriptions and CAW** in core team of Razorpay which is responsible for enabling Razorpay's products stack for international markets.

Enabled **Merchant Onboarding and Partnership Programmes** for Malacca Region which simplify the process of onboarding new merchants and also helps us onboarding more merchant via partnership programmes.

Integrate **UMobile a new Payment Gateway (Switch)** to enable domestic card payments in Malacca Region which is responsible for **2% off all the card payments and 100% for UnionPay cards**.

Create **Sumologic and Grafana dashboards and alerts** for notification delivery, subscription payments, mandate registrations, subscription registrations, card payments etc.

Worked on **Issuer and Network Tokenization of Cards** to remove the dependency of card storage on Razorpay end according to the latest **RBI guidelines**.

Backend Developer, HealthifyMe Wellness Co.

Jun 2021 - Feb 2022

Design and Implement **Quick Food Tracking** for users that reduce the number of steps and simplify the process of food tracking and improved the retention rate.

Design and Implemented **Journey Based Reminders** that supports building journeys for specific user segments with reminders.

Add a **security layer** on the top of **payments, call bookings** and others by adding two-factor authentication.

Developed a **Coach Training Automation** module that streamlined the onboarding process for new coaches and boosted the quality of service by 22%.

Worked on **Django Admin Dashboard** for internal apps.

Backend Developer Intern, Digi-Prex

Jan 2020 - May 2020

Worked on **Raksha Card Companion App** deployed on playstore.

Design and Implemented backend of a **Static Site Generator** that creates new websites within a small time and is able to generate more than 3000+ static websites using five bootstrap templated thereby increasing productivity and cost-cutting.

PROJECTS

Tickets (Microservices+Docker+EventBus)

It is a web-based online ticket booking platform based on Microservices Architecture.

Used Docker for containerization of services and run multiple docker containers using docker-compose.

Used REST API's for communication between services.

Tech Stack - Node.js, MongoDB, Docker.

<https://github.com/goyalaadi121998/Tickets>

Emaily

It is a review request application that sends multiple review requests on email and gets back the response using webhooks on our server.

Used Docker for containerization of application and run multiple docker containers using docker-compose.

Tech Stack - Node.js, Express.js, MongoDB, JWT, Sendgrid API, Docker.

<https://github.com/goyalaadi121998/EmailSurvey>

Core Node.js

Have multiple projects on github related to core node.js functionalities.

EDUCATION

National Institute of Technology, Kurukshetra (NITKKR), B.Tech

Aug 2017 - May 2021

Electronics and Communication Engineering

GPA: 7.5

SKILLS

Programming Languages: C, C++, Javascript, Python, Golang

Backend Development: Golang, Django, Node.js, Express.js, MongoDB, MySQL, Docker, Redis, REST API's

Others: Git & GitHub, Sentry, Sumologic, Grafana, Datadog, Coralogix
